- Clean lamps and filters.
- Check for lights damage by site vehicles, etc.
- Check operation of lights controls.
- General check of ILS shelter.
- Visual check to ILS antennas.
- Visual check to ILS display for any alarm.

WEATHER STATION SYSTEM GROUP LEADER

QUALIFICATIONS:-

- Have a minimum of five (5) years' experience in performing (mechanical/instrument/electrical) services in weather station maintenance with sufficient documentation satisfactory to SAUDI ARAMCO as proof of such experience.
- Have at least a minimum of Bachelor of Engineering degree.
- Be fluent in speaking, reading and writing English.

PRINCIPAL TASKS:-

The principle tasks of the Weather Station System Group Leader shall include, but not be limited to, the following:

- Supervising and leading all activities associated with Preventive maintenance (PM), corrective maintenance and repairs activities for all Weather Stations Systems
- Focal point for any communication with the Company Representative.

WEATHER STATION MAINTENANCE TECHNICIAN

QUALIFICATIONS:-

- Have a minimum of five (5) years' experience in performing (mechanical/instrument/electrical) services in weather station maintenance with sufficient documentation satisfactory to SAUDI ARAMCO as proof of such experience.
- Have at least a minimum of high school diploma.
- Be fluent in speaking, reading and writing English.

PRINCIPAL TASKS:-

The principle tasks of the Weather Station Maintenance Technician shall include, but not be limited to, the following:

- Check and repair the visibility sensor as applicable.
- Perform visibility sensor calibration.
- Perform servicing and lenses cleaning for the visibility sensor.
- Check and repair the cloud height sensor as applicable.
- Perform cloud height sensor calibration.
- Tower structure and fixtures for condition and security.
- Tower base for corrosion, security and stability.
- All meteorological sensors cabling for signs of deterioration and security.
- All meteorological sensor connectors for corrosion and sealing.

INSTRUMENT JFS TECHNICIAN

QUALIFICATIONS:-

- Have a minimum of five (5) years' experience in performing maintenance services in aircraft jet fuel systems with sufficient documentation satisfactory to SAUDI ARAMCO as proof of such experience;
- Have at least a high school diploma; and
- Be fluent in speaking, reading and writing English.

PRINCIPAL TASKS:

The principle tasks of the Instrument JFS Technician shall include, but not be limited to, the following:

- Performing preventative maintenance for all jet fuel instrumentation systems.
- Troubleshooting, repairing and replacing all instruments when needed and can use all manuals and wiring diagrams.
- Replacing and calibrating all positive displacement meters for all loading and offloading meters.
- Operating and calibrate all pressure gauges.
- Repairing control panels.
- Checking and repairing pneumatic, electrical and electrostatic emergency shutdown system.
- Reporting defects, risks, necessary repairs and parts those are due for change.

ELECTRONIC JFS TECHNICIANS

QUALIFICATIONS:

- Have a minimum of five (5) years' experience in performing (Mechanical/Instrument/Electrical/Electronic) maintenance services in aircraft jet fuel systems with sufficient documentation satisfactory to SAUDI ARAMCO as proof of such experience;
- Have at least a high school diploma; and
- Be fluent in speaking, reading and writing English.

PRINCIPAL TASKS:

The principle tasks of the Electronic JFS Technician shall include, but not be limited to, the following:

- Diagnosing, troubleshooting, maintaining and repair electronic malfunctioning jet fuel system equipment.
- Installing new electronic equipment/component on the jet fuel system.
- Conducting preventive maintenance for electronic equipment, identify electronic equipment maintenance needs; record equipment readings.
- Performing routine electronic maintenance activities on equipment, order and maintain stock levels of consumable electronic spare parts for jet fuel system equipment.
- Maintaining records of equipment function readings and history; maintain preventative maintenance records and schedules.
- Maintaining efficient records on operations and activities; maintain equipment safety records; maintain and record shipping and receiving of parcels; prepare a variety of reports on data.
- Ensuring and adhering to safe work practices and procedures including, but not limited to work permit, lockout/tag out and confined space rules and regulations.
- Interpreting electronic drawings, blueprints, schematics and diagrams for a jet fuel system electronic equipment.

FIRE PROTECTION SYSTEM TECHNICIAN

QUALIFICATIONS:-

- Have a minimum of three (3) years' experience in providing maintenance services for fire protection system with sufficient documentation satisfactory to SAUDI ARAMCO as proof of such experience;
- Have at least a high school diploma; and
- Be fluent in speaking, reading and writing English.

PRINCIPAL TASKS:-

The principle tasks of the Fire Protection System Technician shall include, but not be limited to, the following:

- Check and repair the jockey pumps.
- Check and repair the main electrical pump.
- Check and repair the diesel engine driven pump.
- Check and repair the diesel engine.
- Check and repair Siemens XLS fire alarm panels and system.
- Check and repair Honeywell fire alarm panels.
- Check and repair ETON fire controller.
- Check and repair fire foam tanks.
- Check and repair water foam mixer.
- Check and repair foam pump.
